**RE: Lincoln & Holland Tunnel Cross Passages Water Infiltration Mitigation
Port Authority of NY & NJ Contract No. MF-224.031
Type 111 Doors**

Dear Mr. Prejean:

On behalf of Railroad Construction Co. / Moretrench American Corp. JV, thank you to Safe Haven Enterprises for your unwavering support and dedication to providing the hardened security door assemblies for the above referenced project.

Although there were engineering obstacles encountered during this project, Safe Haven took the initiative and diligently worked with our project team to successfully find alternatives that were accepted by the owner, producing a quality product.

The Type 111 doors were of a special forced entry / ballistic resistance designed for unique height and width requirements. They were custom made by Safe Haven to meet the criteria and were delivered as promised. We had no issues with the installation due to the guidance and support that Safe Haven provided.

I highly recommend Safe Haven to be considered for providing products for any future projects.

Very Truly Yours,
Railroad/Moretrench Joint Venture

Eugene A. Sullivan, Jr.
Senior Project Manager
